📍 826B, Ho Sin-Hang Engineering Building, CUHK, Hong Kong SAR

Education

2019/08 – 2023/07	🔖	**Ph.D., Information Engineering**, The Chinese University of Hong Kong.
2017/09 – 2019/01	🔖	**M.Sc., Computer Science**, Boston University.
2013/09 – 2017/06	🔖	**B.Eng., Software Engineering**, Xi'an Jiaotong University.

Employment

2019/08 – present	🔖	**Research & Teaching Assistant**, Department of Information Engineering, CUHK. Advisor: Prof. Daoyuan Wu & Prof. Kehuan Zhang.
2018/06 – 2019/05	🔖	**Research Assistant**, School of Engineering and Applied Sciences, Harvard. Advisor: Prof. Boris Kozinsky.
2017/10 – 2019/05	🔖	**Research Assistant** (part-time), School of Government, Harvard. Advisor: Prof. Nadiya Kostyuk.
2015/05 – 2017/06	🔖	**Research Assistant**, MOE Key Lab for Intelligent Networks and Network Security, XJTU. Advisor: Prof. Chao Shen.

Research Publication

Under Review

1. Zhang, Z., Ma, H., Wu, D., Gao, D., **Yi, X.**, Chen, Y., … Jiang, L. (2022). *LibDeXector: Pinpointing insecure library code clones in massive Android Apps via bytecode-level signature generation and search*. Under review.

Conference Proceeding

1. Fang, Y., Wu, D., **Yi, X.**, Wang, S., Chen, Y., Chen, M., … Jiang, L. (2023). Beyond "protected" and "private": An empirical security analysis of custom function modifiers in smart contracts. In *Proc. ACM ISSTA*.

2. **Yi, X.**, Fang, Y., Wu, D., & Jiang, L. (2023). BlockScope: Detecting and investigating propagated vulnerabilities in forked blockchain projects. In *Proc. ISOC NDSS*.

3. **Yi, X.**, Wu, D., Jiang, L., Fang, Y., Zhang, K., & Zhang, W. (2022). An empirical study of blockchain system vulnerabilities: Modules, types, and patterns. In *Proc. ACM ESEC/FSE*.

4. Jia, Z., Shen, C., **Yi, X.**, Chen, Y., Yu, T., & Guan, X. (2017). Big-data analysis of multi-source logs for anomaly detection on network-based system. In *Proc. IEEE CASE*.

5. Shen, C., Li, Y., Yu, T., Yuan, S., **Yi, X.**, & Guan, X. (2016). Motion-senor behavior analysis for continuous authentication on smartphones. In *Proc. IEEE WCICA*.

arXiv Preprint

1. Yang, X., Wu, D., **Yi, X.**, Lee, J. H. M., & Lee, T. (2022). iExam: A novel online exam monitoring and analysis system based on face detection and recognition. In *CoRR arXiv* (Vol. abs/2206.13356).

2. Chen, M., Wu, D., **Yi, X.**, Xu, J., & Gao, D. (2021). A blockchain-based gateway for trustworthy App delegation from mobile App markets. In *CoRR arXiv* (Vol. abs/2101.06454).

Working Paper

Blockchain Sec.   🔖   Automatic Patch Code Unification and Its Usage in Mainstream Blockchain Systems for Vulnerability Discovery.

IoT OS Sec.   🔖   IoTMapper: NLP-based Patch Understanding for Cross-Mining of Device-dependent Bugs in IoT Operating Systems.

Project Highlight

BlockScope (in *NDSS'23*)   🔖   (i) Proposed an **effective and efficient** tool for vulnerable code clone detection;
(ii) Discovered **101** cloned vulnerabilities in 16 Bitcoin/Ethereum's forked projects and reported them to their developers – most of them received positive responses (with a **bug bounty reward** from Binance);
(iii) Provided a **deep investigation** on the propagation and patching processes of the discovered vulnerabilities.

BlockVuln (in *ESEC/FSE'22*)   🔖   (i) Proposed a vulnerability filtering framework to effectively identify **1,037** vulnerabilities and their **2,317** patches from 34,245 issues/PRs and 85,164 commits on GitHub;
(ii) Revealed that the modules related to **consensus, wallet, and networking** are highly susceptible;
(iii) Identified that around **70% of blockchain vulnerabilities are in traditional types**, but we also identify four new types specific to blockchains;
(iv) Obtained **21 blockchain-specific vulnerability patterns** and demonstrated that they could be applied to detect similar vulnerabilities in other top blockchains.

Teaching Assistant

22'F, 20'F, 19'F   🔖   IEMS 5710: Cryptography, Information Security and Privacy.

23'S, 22'S   🔖   IERG 4210: Web Programming and Security.

21'F   🔖   IERG 4130: Introduction to Cyber Security.

21'S   🔖   IEMS 5722: Mobile Network Programming and Distributed Server Architecture.

20'S   🔖   CSCI 2100: Data Structures and Algorithms.

Research Interest

🔖 Blockchain Security Measurement and Vulnerability Detection;
